Join Biopeople in the fall of 2019:

7 October
**Connect Denmark Springboard**
Biopeople hosts Connect Denmark’s Springboard at the Maersk Tower

8 October
**Brew your own**
First workshop for potential start-ups with tips and advice

10 October:
**IMI Funding opportunities**
Learn about the IMI programme and funding opportunities

19 November:
**Bioagora**
Join us for our annual Bioagora, the theme for this year’s Bioagora will be autoimmune diseases.

21 November
**Workshop on Scientific Advice**
Open Space Lab on Informal Scientific Advice to Entrepreneurial “Newcomers” and Companies [SMEs] in the Development of Medicinal Products - What you need to know to understand regulatory requirements.

26 November
**5th Aarhus Immunotherapy Symposium**
New insights and unexplored opportunities of immunotherapy

An introduction to Biopeople

Catalysing innovation

Connecting academia & companies
Innovation is crucial to the survival of bio- and life science companies. The power of innovation in the Danish life science cluster relies on dynamics and exchange of knowledge. Not just within the individual company or the specific university, but across the whole life science eco system, in which all stakeholders contribute and play their part.

Who is Biopeople?
Biopeople is Denmark's Life Science Cluster, a professional cluster organisation located at the University of Copenhagen – from 2019 with satellites at Aarhus University and Aalborg University Hospital. We are a neutral catalyst for bridging knowledge and establishing new collaborations between public research, companies and other relevant stakeholders such as patient organisations. Our partners include all major public and private research and higher education institutions in Denmark, a large number of private companies plus the Danish Medicines Agency. We are part of the national infrastructure for innovation – an innovation network established and co-funded by the Danish Ministry of Higher Education and Science. Since 2013, we have been awarded the EU Gold Label for Cluster Management Excellence.

What do we do?
Biopeople is here to help with the innovation process. For more than 13 years, we have helped utilise research results for new enterprises, and helped bring the right talent and competences together, both nationally and internationally.

We focus on the biotech and pharma industry, the pre-clinical and clinical part of medicine development and related tech and digital areas. We strive to meet the needs of especially small and medium-sized enterprises and scientists at universities and university hospitals in Denmark, to expand the potential for collaboration. We offer a free network member service and we arrange events and seminars in close collaboration with both network members and stakeholders.

What’s in it for you:
- Free network membership for companies
- National and international network within the bio- and life science communities
- Catalysing collaboration between researchers and companies (SMEs)
- Guidance / feedback re. application for funding
- Access to pitch training
- Joint events
Biopeople supports the health care industry by focusing on themes related to personalised medicine, increased public/private collaboration and patient involvement:

- Auto-immune diseases, prevention and treatment
- Biomarkers from research to commercialisation
- Bioimaging in bio- and life sciences
- Work force qualifications and matchmaking
- Collaboration between industry and academia

- Knowledge sharing and matchmaking
- Exposure of research/technology/company
- Profile in Newsletter (>2,000 recipients, exposure at search platform Infomedia – press clippings)
- Sharing of news at LinkedIn (>2,000 followers)
- Speaker opportunities at events
- Exhibition opportunities at events
