

Newsletter Februar 2018

Why it's not that easy to turn CYP testing into personalised medicine. Get a current overview of the role of the CYP450 system, its central role in drug metabolism, and what the limitations and future perspectives of CYP450 tests are. Do not miss the opportunity to hear and meet a group of experts in the field this Thursday in the Maersk Tower.

International Conference on Perspectives in Precision Medicine 28 February - 1 March 2018. This International Conference on Perspectives in Precision Medicine will focus on possibilities and challenges in the cross field between pharmaceutical development, user involvement and Information and Communications Technology (ICT). The conference especially targets SMEs, researchers and anyone else who are looking into new insight and knowledge on personalised medicine, want to discover new business and research opportunities, meet potential partners, expand their network, and be inspired by a world leading pharmaceutical hub in the heart of Copenhagen.
